## SUMMARY

Full-Stack Web Developer with 5+ years of experience in WordPress, PHP, JavaScript, and REST API development. Specialized in custom plugin development, system integrations, workflow automation, and legacy system modernization, delivering scalable, secure, and maintainable solutions. Proficient in WPCS/PHPCS/PSR coding standards, and CI/CD, with experience mentoring developers, collaborating with stakeholders, and delivering measurable business value through process automation and cost optimization.

## EXPERIENCE

### SOCIAL PANGA[↗] | SENIOR WEB DEVELOPER

April 2023 - Present

- Engineered an automated lead capture and recovery system featuring configurable exponential backoff, error-specific retry logic, and centralized monitoring, improving successful lead submissions by **8%** and reducing lead loss across marketing campaigns.
- Developed custom WordPress plugins to automate HR workflows and job application management, eliminating **10+ hours of manual processing per week**.
- Architected integrations across mobile applications, CRM systems, and CMS platforms, enabling real-time content synchronization and eliminating **80+ hours of manual updates per month**.
- Replaced costly third-party services with a secure, in-house CRM–CMS integration, saving **$4,000+ in annual subscription costs** while improving data ownership and control.
- Modernized legacy applications and outdated plugins through performance optimization, security hardening, and accessibility improvements, strengthening maintainability, scalability, and security.
- Refactored legacy code to align with WordPress Coding Standards (WPCS), PHPCS, and applicable PSR standards, improving code consistency, readability, and maintainability.
- Mentored junior developers through weekly technical knowledge-sharing sessions, reinforcing coding best practices, code quality, and collaborative problem-solving.

### SOCIAL PANGA[↗] | WEB DEVELOPER

July 2021 - March 2023

- Improved development workflows by adopting a responsive, modular, mobile-first approach, reducing maintenance time by **20%** and improving code reusability and scalability.
- Developed and deployed custom WordPress themes, reusable UI kits, component libraries, and internal dashboards, supporting development and maintenance across **20+ client websites**.
- Maintained and optimized WordPress websites through routine updates, security audits, bug fixes, and performance enhancements, improving application stability, security, and user experience.

### NEXGEN INNOVATORS[↗] | FRONT-END WEB DEVELOPER

Dec 2019 - July 2021

- Developed and customized **15+ WordPress themes**, delivering tailored website functionality, responsive layouts, and user-friendly experiences aligned with client requirements.
- Built conversion-focused landing pages and digital marketing assets to support client campaigns, strengthen user engagement, and align website experiences with campaign objectives.

## SKILLS

### PROGRAMMING & WEB DEVELOPMENT

PHP, JavaScript (ES6+), WordPress, Laravel, jQuery, HTML5, CSS3, SASS/SCSS, Bootstrap, Tailwind CSS

### WORDPRESS & API INTEGRATION

Custom Theme & Plugin Development, WordPress Hooks & Filters, Gutenberg, REST APIs, Webhooks, Third-Party Integrations, CRM/ERP Integration

### DATABASES & BUILD TOOLS

MySQL, SQLite, Gulp, NPM, Bun, Yarn

### DEVOPS & SERVER ADMINISTRATION

Linux, SSH, Nginx, Apache, DNS, SSL/TLS, Cron Jobs, Log Analysis, Git, GitHub Actions, CI/CD, Docker

### TESTING & CODE QUALITY

WPCS/PHPCS, PSR Standards, Code Reviews, Sentry

### PERFORMANCE & UI ENGINEERING

Web Performance Optimization, Responsive Design, Cross-Browser Compatibility, Accessibility, Browser DevTools

### AI & DEVELOPMENT TOOLS

Claude Code, OpenCode, VS Code, Figma

## EDUCATION

**MACHINE LEARNING ENGINEER NANODEGREE** - UDACITY INC. Mar 2019 – Dec 2019

**ELECTRONICS AND COMMUNICATION ENGINEERING** - GTBIT, GGSIPU Aug 2014 – May 2018
